

Evidence Collection with DNA- free* Consumables

* DNA free means:

DNA of any kind that might be present is degraded to such small fragments, due to treatment with ethylene oxide, that no human profile can be generated with PCR amplification methods.

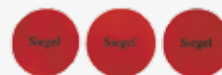

Manufacturing and production of examination materials according to the "New standards for the production process of consumables and reagents for the forensic DNA-analysis and evidence collection" of the German Federal Criminal Police office. Production and treatment with ethylene oxide are accredited.

Folding Box System

Collection Kit for the sampling of oral mucosa consisting of
 10 Folding Boxes
 20 sterile Cotton Swabs (EO-treated)
 30 Seals

Cat.No.	Description	Unit
47888	Collection Kit	1 kit
	For an order of 10	1 kit
	For an order of 100	1 kit
	For an order of 500	1 kit

Tube System

Prionics (FORENSIX) Evidence Collection Tubes

DNA-free* with self-drying system

guarantee a very fast drying (**active drying**) and are recommended by the task force "DNA-analysis" of the German federation and federal states. A drying period of only 4 hours can be guaranteed (compare diagram on the left). The growth of bacteria and fungi can be prevented to protect the precious DNA. The evidence is long lasting even without cooling as well as in **humid surroundings**.

For dried up evidence please use the **Evidence Collection Kit** which includes **one ampoule of sterile water**.

Please note: On this there is a paper under the title „The forensiX Evidence Collection Tube and Its Impact on DNA Preservation and Recovery“ im Journal BioMed Research International, <http://www.hindawi.com/journals/bmri/2013/105797/>

Prionics (FORENSIX)

Tubes with Self-Drying System

Cotton swab with wooden stick (compare diagram on the left for drying performance)

Cat.No.	Description	Unit
47258	Comparison Sample	150mm 1 unit
47389	Evidence	100mm 1 unit
47259	Evidence	150mm 1 unit
47386	Evidence with water	100mm 1 kit
47260	Evidence with water	150mm 1 kit
47391	Set of 5 Evidence with water	100mm 1 kit
49517	Set of 5 Evidence with water	150mm 1 kit
49518	Set of 2 Fingernail-Dirt-Kit (pointed cotton swab and 2 seals)	150mm 1 kit

Prionics (FORENSIX)

Tubes with Self-Drying System

Nylon flocking material with plastic stick

Cat.No.	Description	Unit
49519	Evidence	100mm 1 unit

Prionics (FORENSIX) BasicDry™ Evidence Collection Cardboard Tube – “End EO treated”

Cotton swab with wooden stick in cardboard tube

Passive Drying through cardboard (compare diagram on the left for drying performance)

Neutral Label for Evidence Collection and Buccal Swab

Cat.No.	Description	Unit
50299	BasicDry in cardboard tube	150mm 1 unit

* DNA-free means: DNA of any kind that might be present, is degraded to such small fragments, due to treatment with ethylene oxide, that no human profile can be generated with PCR amplification methods.

Securing of Evidence after Sexual Assault

Sexual Assault Care Kit by Prionics (FORENSIX)

Securing of Evidence for DNA-analysis after a sexual assault. Cardboards with EO-treated cotton swabs, a selection of examination and packaging material and a step by step protocol.

List of items on request!

Kit 1 – complete

The kit contains evidence collection boxes (folding boxes) with cotton swabs for securing of evidence on all relevant parts of the body, ampoules with sterile water and a selection of examination and packaging material such as clothing bags, combs and sampling tubes for blood and urine.

Kit 2 – mini

The kit is a smaller version of the Kit “complete” and contains 10 evidence collection boxes and examination materials.

Kit 3 – children

The kit is specially designed and equipped for the examination in cases involving children who have been sexually assaulted.

Kit 5 – Hessen-Kit

The kit has been developed together with the LKA Hesse and the advice centre „women’s emergency hotline“ Frankfurt and is recommended by the Society of Gynaecology and Maternity.

Kit consists of:

16 evidence collection tubes with self-drying system and further examination equipment.

Cat.No.	Description	Unit
47273	Sexual Assault Care Kit 1 complete	1 kit
47274	Sexual Assault Care Kit 2 mini	1 kit
47275	Sexual Assault Care Kit 3 child	1 kit
47261	Sexual Assault Care Kit 5 „Hessen-Kit“	1 kit
49782	Accessories for Hessen-Kit (without evidence collection tubes)	1 kit

DEBATIN

Further DNA-free* Consumables, treated with EO and certified DNA-free
Force-Forex™ Adhesive Stamp
for collection of DNA traces

Cat.No.	Description	Unit	
50260	Force-Forex TM Adhesive Stamp	5 units	1 package

Sarstedt Forensic Swab

Cat.No.	Description	Unit	
49637	Forensic Swab staff made of polystyrene individual sterile packaging	102mm	1 unit
50735	Forensic Swab with wooden stick individual sterile packaging	102mm	1 unit
51627	Forensic Swab head of swab pointed wooden stick, individual sterile packaging	102mm	1 unit
49043	Forensic Swab XL (stick made of polystyrene)	150mm	1 unit

Disposable Nitrile Gloves, DNA-free
EO treated gloves, powder-free, with rolled cuffs,
30cm long, EN 420, EN 374, AQL 1.5, packaged sterile in pairs

Cat.No.	Description		Unit
51702	size Small	(6-7)	1 pair
51703	size Medium	(7-8)	1 pair
51704	size Large	(8-9)	1 pair
51705	size X-Large	(9-10)	1 pair

Safebag Debabreathe®

The bag is breathable, DNA-free after EO treatment, very strong, tearproof film, with safety closure for the final sealing, labelling field from size S onwards, 5mm lamination, safety printing on the sides – suitable for forensic conservation of evidence.

Please note, the given dimensions are external dimensions! The usable size is reduced because of the safety print on the sides: width minus 15mm, height minus 40mm.

Cat.No.	Description		Unit	
47570	85 x 120mm	XX-Small	50 units	1 package
47571	110 x 180mm	X-Small	50 units	1 package
47572	195 x 320mm	Small	50 units	1 package
47573	335 x 420mm	Medium	25 units	1 package
47574	495 x 520mm	Large	25 units	1 package
47575	635 x 800mm	X-Large	25 units	1 package

Reaction Tube with Safety Lock

Cat.No.	Description	Unit	
49329	Test Tube, 1.6ml, graduated, individually packed, DNA-free safety closure	250 units	1 package

Comb, DNA-free*

Cat.No.	Description	Unit
50970	Comb DNA-free, individually packed EO-gas-flushed	1 unit

Further Examinations

Cotton Swabs in Tube, sterile

Plastic tube approx. 150mm x 12mm, plastic plug, cotton swab with plastic or wooden stick, (treated with r/gamma rays)

Graduated prices on request

Cat.No.	Description	Unit
47907	Transport Swabs sterile plastic stick	100 units 1 package
47908	Transport Swabs sterile wooden stick	100 units 1 package

4N6FLOQSwabs

Plastic stick and nylon flocking material, certified free from DNase, RNase and amplifiable human DNA, high absorbing capacity and excellent sample recovery.

Cat.No.	Description	Unit
51104	Transport Swab with one swab and rated break point, approx. 170mm x 11mm normal size point	100 units 1 package
51105	Transport Swabs, with two individual swabs and rated break point, approx. 170 x 11 mm normal size point	100 units 1 package
51106	Lollipop Swabs in clear packaging roundly formed point	50 units 1 package
51107	Swabs in transparent packaging rounded end normal size point	100 units 1 package
51108	Swabs with rated break point and 2ml Eppendorf reaction tube with evaporation channel in clear packaging normal size point	100 units 1 package

Cotton Swabs

Cat.No.	Description	Unit
47909	Cotton Swabs, cotton at both ends 77mm	200 units 1 box
47910	Cotton Swabs, cotton at one end 150mm	100 units 1 package

Cat.No.	Description	Unit
47536	Cotton Swabs, cotton at one end with wooden stick, individually packed EO-treated	100 unit
		2500 unit
47442	Cotton Swabs, cotton at one end with wooden stick, set of 2 individually packed EO-treated	100 kit
		1500 kit

Blood Sample Kit – can be individually adapted to your needs by request!
Graduated prices on request!

Blood Withdrawal Kit - Vacuum Systems

consisting of: disposable sterile safety cannula/needle, holder for cannula/needle, alcohol-free disinfection pad, cellulose swabs, band-aid, in Post-Box UN 3373

Cat.No.	Description	Unit
47891	without blood sample tube	1 kit
49536	EDTA 3ml testing for alcohol/DNA	1 kit
50518	Neutral 10ml testing for alcohol/narcotics	1 kit
50519	Sodium Fluoride 10ml testing for narcotics/cocaine/alcohol	1 kit
50796	Neutral and Sodium Fluoride 10ml testing for alcohol/narcotics/cocaine	1 kit

Aspiration Systems

consisting of: disposable safety canula sterile, holder for canula, protective box, disinfection pad free of alcohol, cellulose swabs, band-aid, in Post-Box UN 3373, incl. seal lid

Cat.No.	Description	Unit
50952	Neutral 10ml testing for alcohol/narcotics	1 kit
50953	Neutral and Fluoride 10ml testing for alcohol/narcotics/cocaine	1 kit

Disinfection free of alcohol

Cat.No.	Description	Unit
50766	Disinfectant Wipes, alcohol-free and iodine-free	
	Sachet	100 1 unit
	Sachet	500 1 unit
	Sachet	1000 1 unit
50732	Octenisept Disinfectant	50ml 1 bottle

Urine Sample (Kit)

consisting of: Urine-Monovette standard with suction tip and closing lid, protective box with inlay for absorption of moisture, instructions, in Post-Box UN 3373

Cat.No.	Description	Unit
51781	Urine Sample Kit	1 kit

Urine-Monovette

Hygienic and problem-free: Urine is gathered out of the collection beaker through positioning the suction tip and pulling back the plunger. Used for strip tests and centrifuge tubes for sediment extraction.

Cat.No.	Description	Unit
50926	Urine-Monovette Standard	64 units 1 package

Beaker

Cat.No.	Description	Unit
48933	PP, 125ml, graduated, without cap	100 units 1 package
49330	PP, 100ml, graduated, screw cap	1 package
47897	PP, 125ml, graduated, with snap-on lid	10 units 1 package
50840	Uro-Box, 42 x 96 mm	10 units 1 package

Pre-Test for Detection of Blood

Test Strips as proof of blood traces, individually welded

Cat.No.	Description	Unit
47898	Peroxtesmo (25 test strips)	1 unit

Test Strips for urine analysis or as proof of blood

Cat.No.	Description	Unit
47899	Hemastix (50 tests)	1 unit

Quick Test for identification of human blood

Cat.No.	Description	Unit
47900	Hexagon Obti (24 tests)	1 unit

Paratex I/60 Interface for Blood Traces

Kit consists of:

100 x Paratex I/60 interface for blood traces

1x transparent box 68 x 28 x 18mm

Cat.No.	Description	Unit
47906	Paratex I/60 Interface for blood traces	1 kit

Blood Traces – Development of Evidence – Reagents

in aluminium bottle, plastic bottle with spray nozzle or as powder in wide-neck bottle

Cat.No.	Description	Unit
51731	LumiScene Blood Traces Solution 250ml parent solution with micro sprayer and one pill for activation	250ml 1 bottle
49893	Gentian Violet Solution	50ml 1 bottle
47657	Amido Black Solution, water-based	500ml 1 bottle
48662	Fuchsin acid (Hungarian Red)	500ml 1 bottle
47958	Phenolphthalein	20g 1 container

Pre-Tests for the Detection of Semen

provides evidence even at low concentration of seminal fluid
consisting of:

40 tests with a plastic pipette for each one,
instructions and 50 ml extraction buffer

Cat.No.	Description	Unit
50838	Sperm Pretest, PSA-SEMIQUANT	40 tests 1 package

Test Strips as proof of sperm stains
